

# Map-Update

## INE-W611D(C)

### Map Update Process for INE-W611D / INE-W611DC / INE-W611DU

English

Sep 2021, Version 1.1

## Instructions for updating the map data for INE-W611D / INE-W611DC:

Please register at [alpine.naviextras.com](http://alpine.naviextras.com). Download the "Toolbox" from the download area before following the Map Update instructions for your Alpine navigation device.

### Naviextras Toolbox

[Alpine.naviextras.com](http://Alpine.naviextras.com) is the official map update portal for Alpine.

Some [alpine.naviextras.com](http://alpine.naviextras.com) site features, including buying updates, require that your Alpine navigation device is registered.

Please register your Alpine navigation device and your required personal data within Naviextras Toolbox, which is a free PC-tool.

[alpine.naviextras.com](http://alpine.naviextras.com)

### Requirements and limitations:

- Windows XP / Windows 7 / Windows 8 / Windows 10
- Software for unpacking ZIP files
- USB stick with minimum 16 GB recommended (freshly FAT32 formatted)

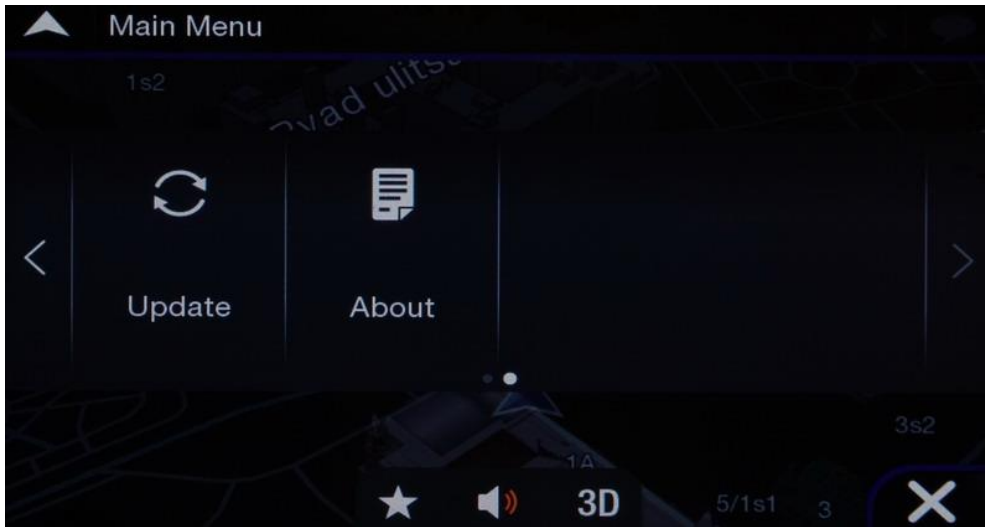

**Do not delete any files / folders from the USB stick and do not add any files / folders manually.**

### Note:

The map update process may consist of two parts - depending on the pre-installed navigation firmware on your navigation device. For more information, see the update instructions.

## Map Update Process

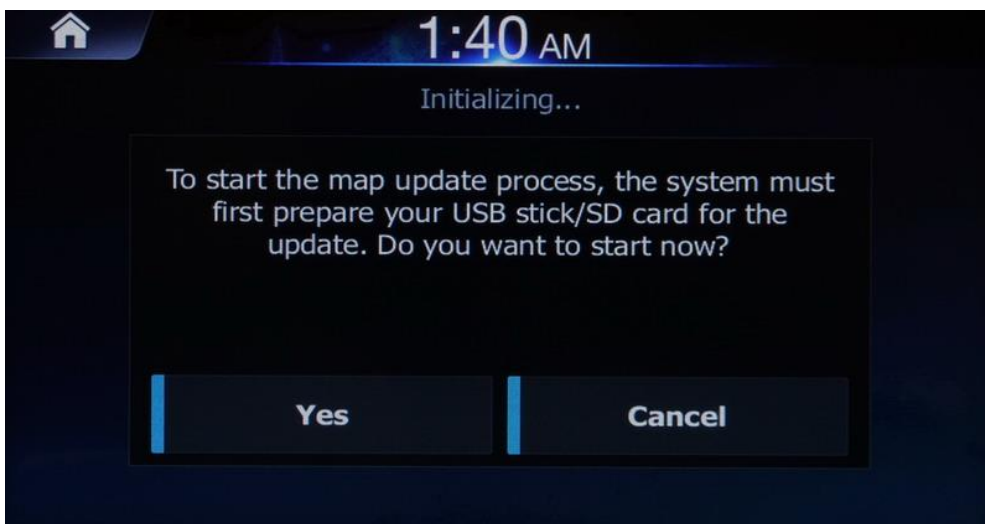

- 1) Connect an empty USB stick (freshly FAT32 formatted) to the navigation system.
- 2) Go to Navigation → Main Menu → scroll to right → Update. Press the soft key **“Update”**.

- 3) The Update tool starts up.

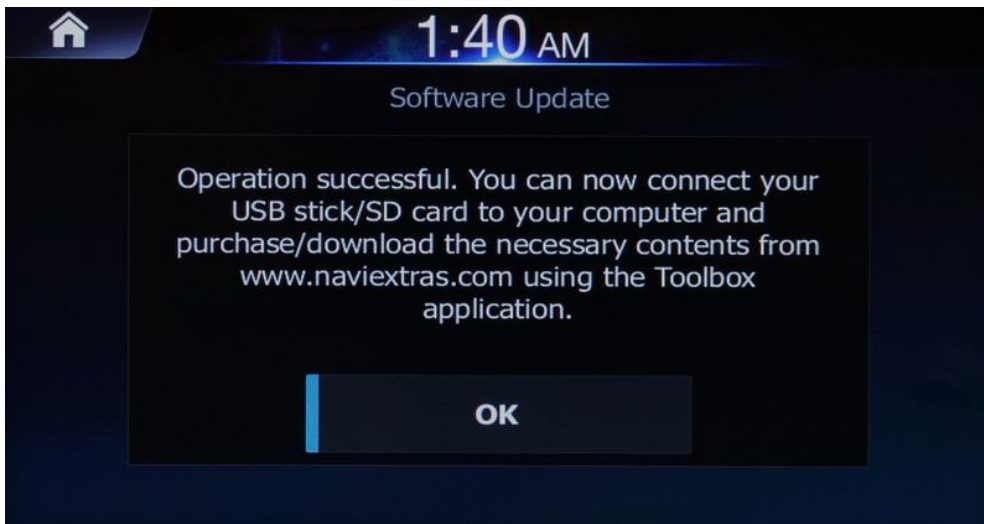

- 4) Confirm with soft key **“Yes”**.

- 5) Device information transferred to the USB stick.  
Do not disconnect the USB stick and do not power off the unit.

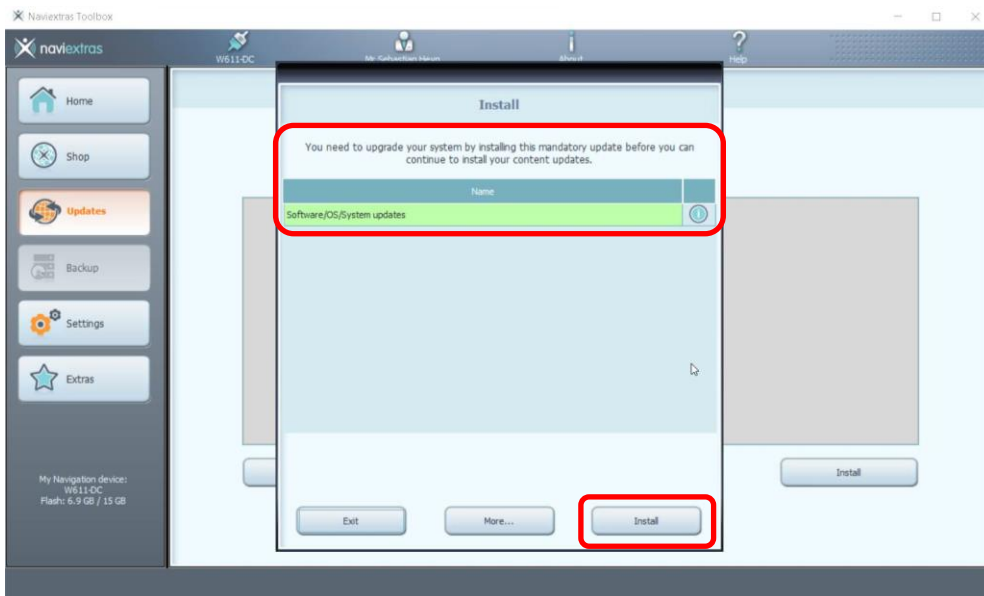

- 6) Confirm with "OK".

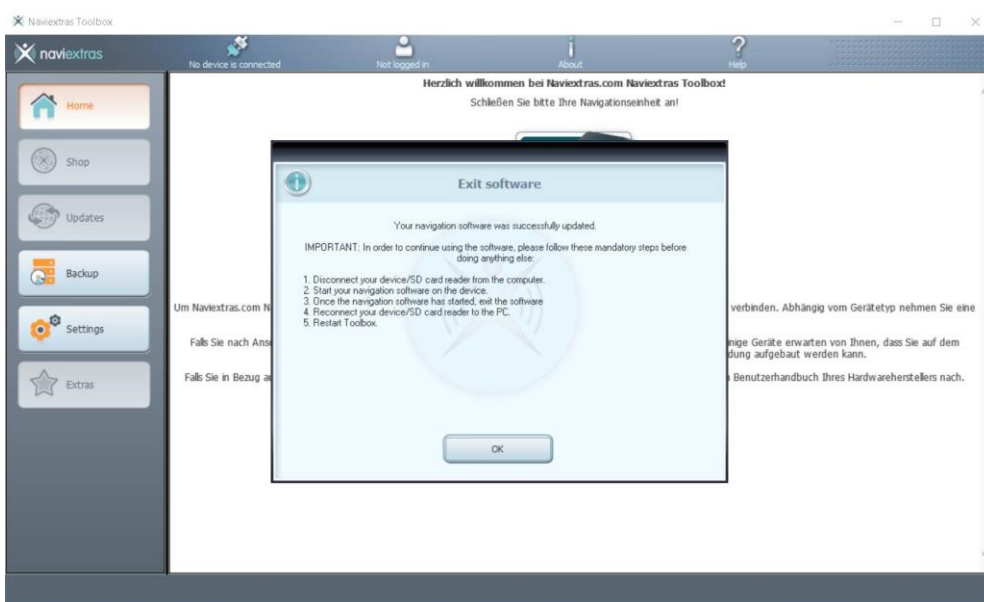

- 7) Remove the USB stick from your navigation device.

- 8) Go to [alpine.naviextras.com/shop/portal/downloads](http://alpine.naviextras.com/shop/portal/downloads) and follow the instructions on naviextras.com website how to download and install Naviextras Toolbox.
- 9) Connect the USB stick to your PC.
- 10) Start Naviextras Toolbox. The USB stick will be recognized as your navigation device.  
 Push the button "**Updates**". If a pop-up window (see point 11) with the notification "*You need to upgrade your system by installing this mandatory update...*" **NOT** appears go directly to point 31 and follow the instructions from there.
- 11) Install the new navigation software with the Naviextras Toolbox. Press the "**Install**" button.

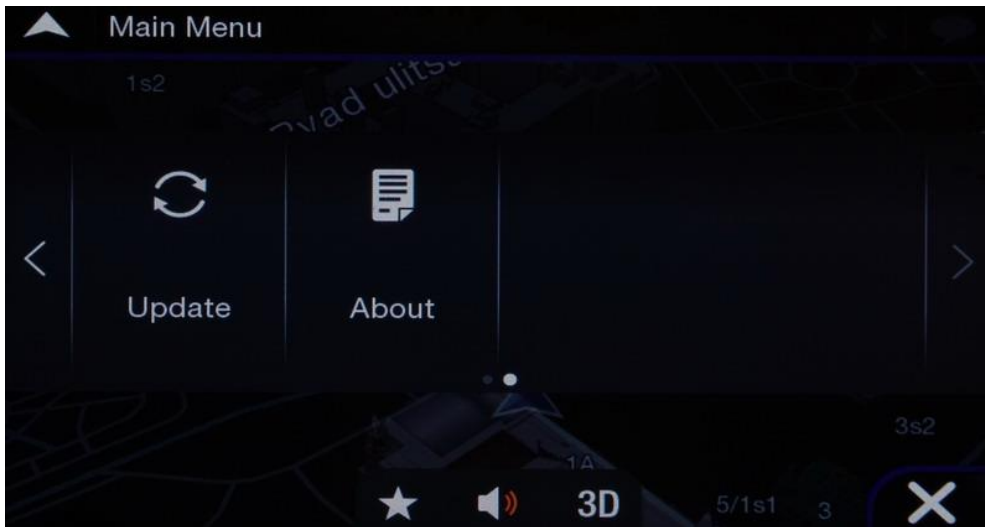

- 12) After transferring the data to the USB stick, the following screen is displayed.

Follow the instructions.

- 13) Safely remove the USB stick from your PC.

- 14) Reconnect the USB stick to your navigation device.
- 15) Go to Navigation → Main Menu → scroll to right → Update  
Press the soft key **“Update”**.

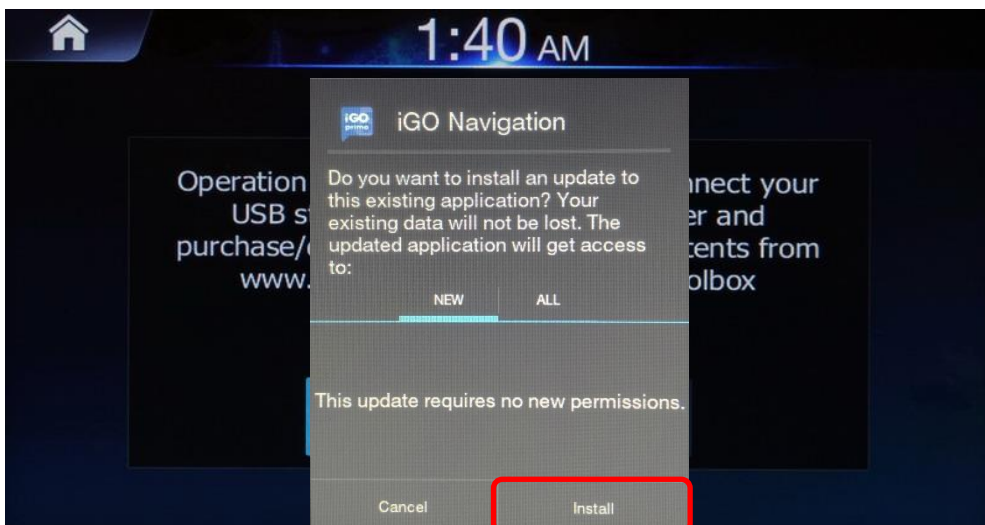

- 16) The Update tool starts up.

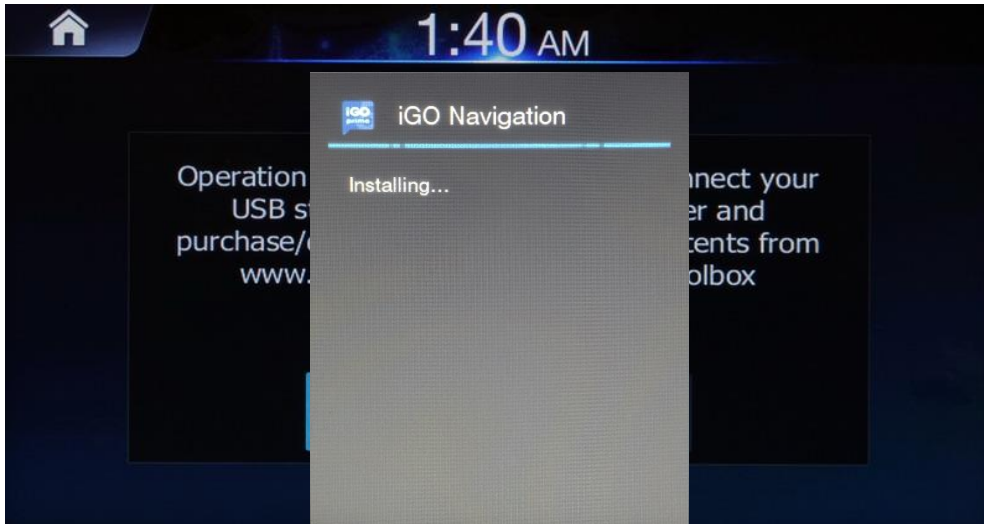

The Initialization screen is displayed for approximately 2 to 4 minutes.

- 17) Then Confirm with soft key **“Yes”**. Confirm the dialog box by pressing **“Install”**.

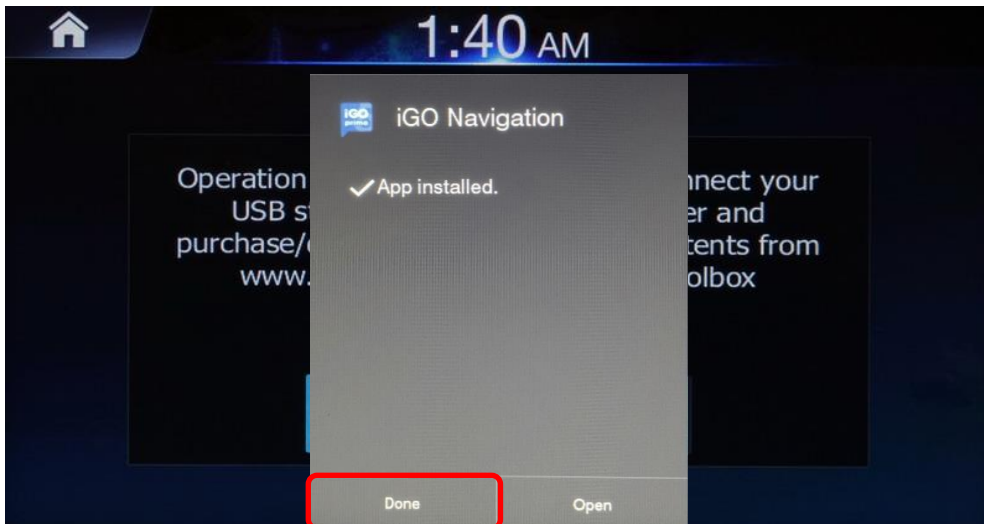

- 18) Navigation Software update is executed.  
Do not disconnect the USB stick and do not power off the unit.

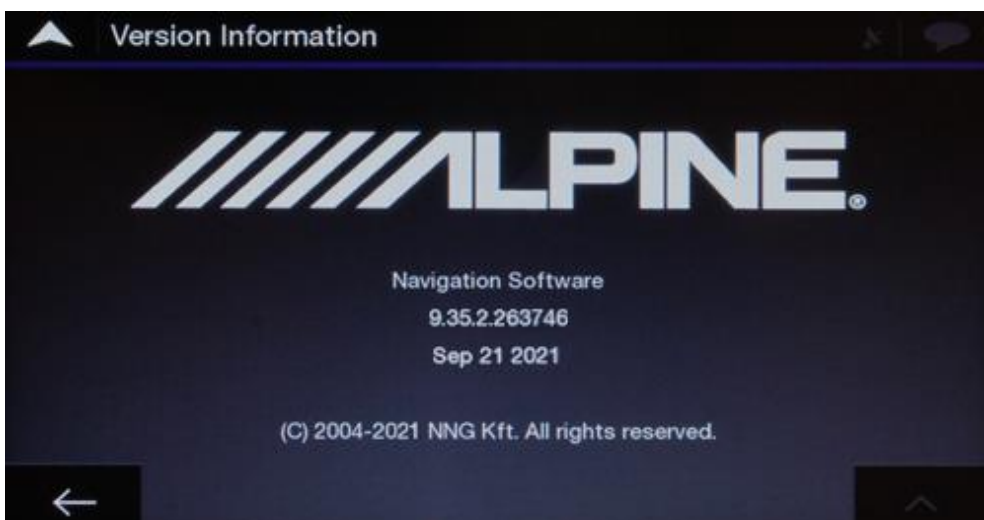

Please note: The Update process will take up to 2 minutes.

- 19) Confirm and finalize the update by pressing “**Done**”. Remove the USB stick from your navigation device. The USB stick must be prepared again for the next step.

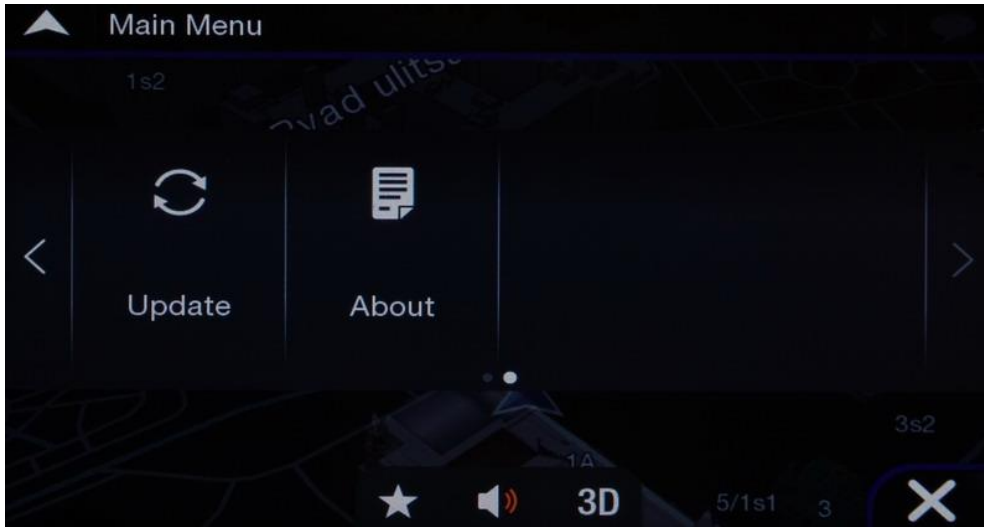

The navigation firmware was updated successfully.

- 20) Switch off the navigation device via ignition (ACC) for 2 minutes or perform a reset. Then switch the navigation device on again.
- 21) Go to Main Menu → scroll to right → About → **Version Information** to check the latest Navigation Software Version (9.35.2.263746 Sep 21 2021 or newer).

## Map Update Process

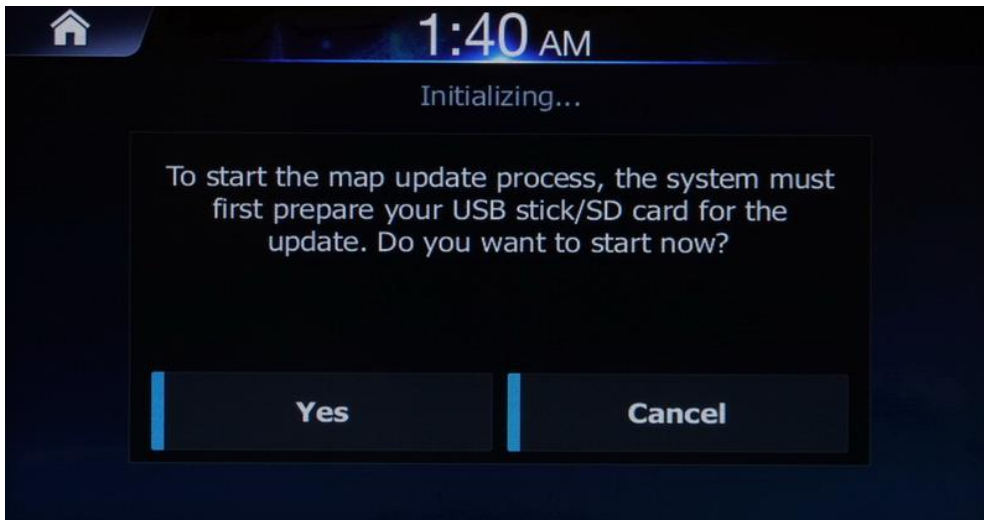

- 22) Connect the USB stick (freshly FAT32 formatted) to the navigation system.
- 23) Go to Navigation → Main Menu → scroll to right → Update  
Press the soft key **“Update”**.

- 24) The Update tool starts up.

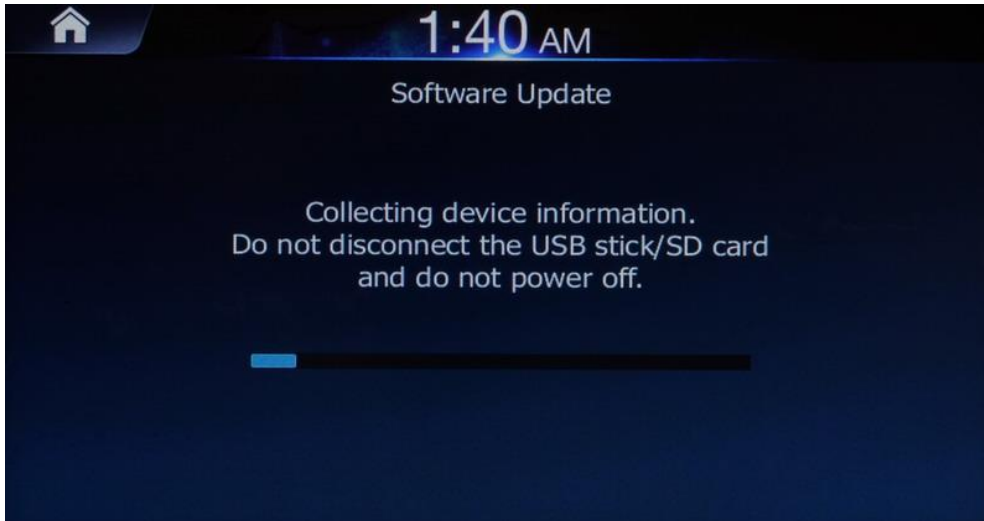

- 25) Confirm with soft key **“Yes”**.

- 26) Device information transferred to the USB stick.  
Do not disconnect the USB stick and do not power off the unit.

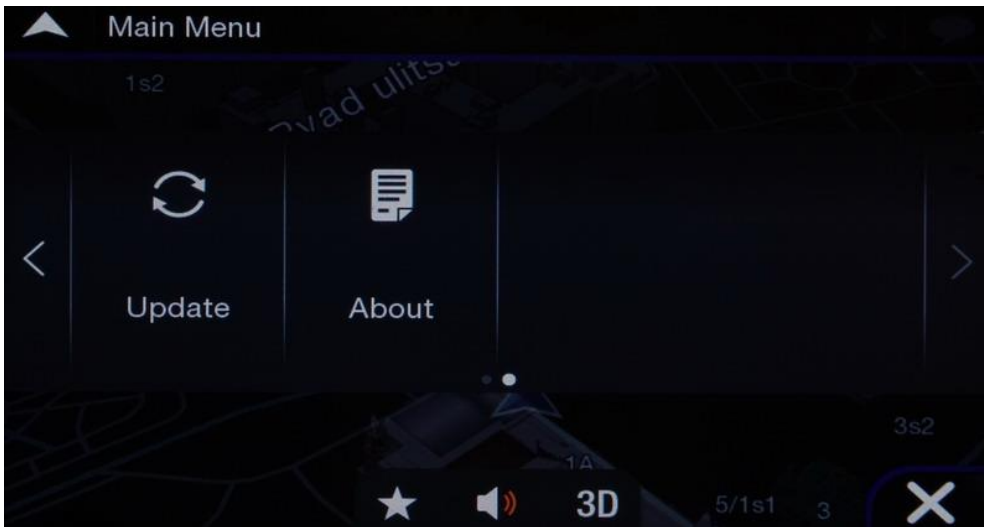

- 27) Confirm with "OK" and remove the USB stick from your navigation device.

- 28) Go online on [alpine.naviextras.com/shop/portal/downloads](http://alpine.naviextras.com/shop/portal/downloads) and follow the instructions on naviextras.com website how to download and install Naviextras Toolbox.
- 29) Connect the USB stick to your PC.
- 30) Start Naviextras Toolbox. The USB stick will be recognized as your navigation device.
- 31) Purchase and install content and updates as described within Naviextras Toolbox.
- 32) Safely remove the USB stick from your PC.

- 33) Reconnect the USB stick to your navigation device.
- 34) Go to Navigation → Main Menu → scroll to right → Update  
Press the soft key **“Update”**.

- 35) The Update tool starts up.

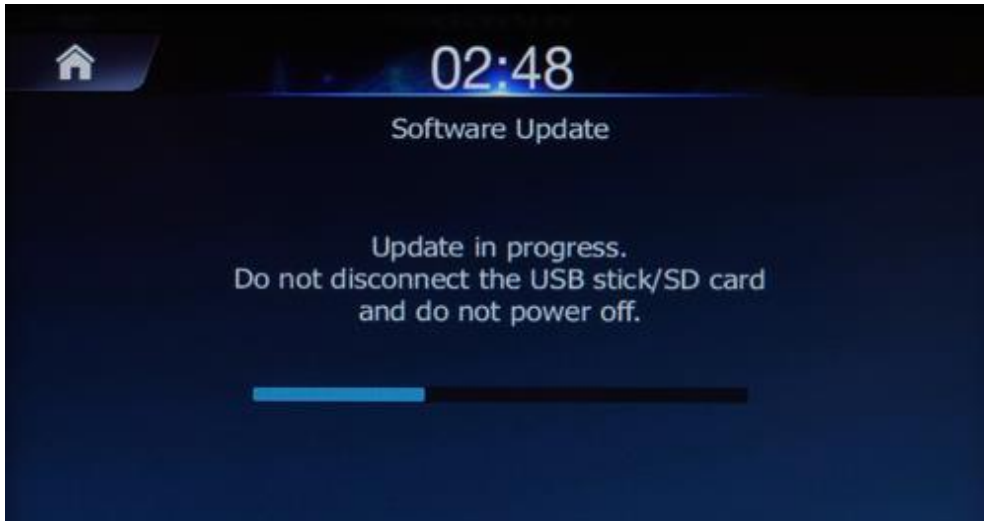

The Initialization screen is displayed for approximately 4 to 10 minutes.

- 36) Then Confirm with soft key **“Yes”**.

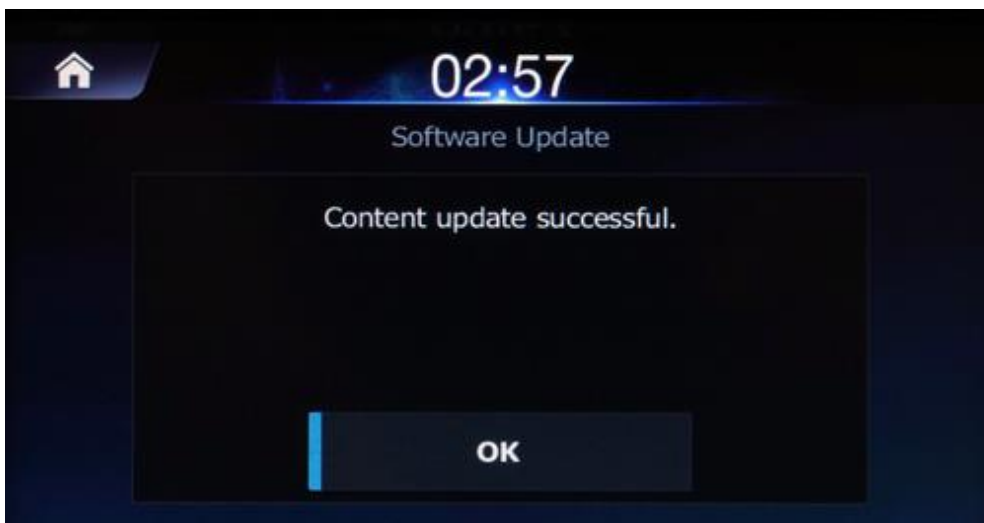

- 37) Software and Map update are executed.  
Do not disconnect the USB stick and do not power off the unit.

Please note: The Update process will take up to 30 minutes.

- 38) Confirm with soft key "Yes" to finalize the Update process.

The map data was updated successfully.

- 39) If a new Navigation Software update is now offered for execution, please confirm the pop-up window and follow the instructions as described in points 17 - 19.
- 40) Remove the USB stick from your navigation device.
- 41) Go to Main Menu → scroll to right → About → **Version Information** to check the latest Navigation Software Version (Feb 17 2020 or newer).
